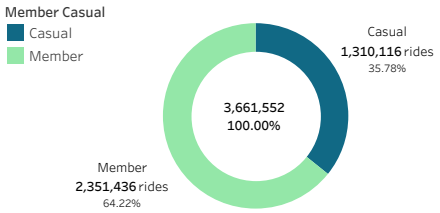
# CYCLISTIC BIKE DASHBOARD - 2025

How do annual members and casual riders use Cyclistic bikes differently?

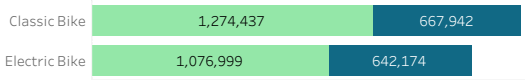
Bicycle Type | Member Casual

3,661,552
bike rides in **2025**



**Insight:**
Annual members account for approximately 64.2% of all bike rides, with 2,351,436 rides out of 3,661,552 total rides in 2025. Casual riders contribute the remaining 35.8%, representing 1,310,116 rides.

## Bicycle Type

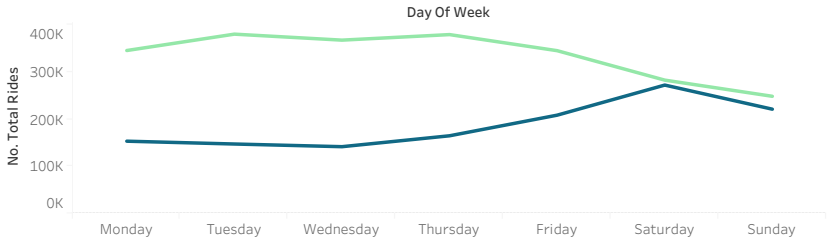


**Insight:**
Classic bikes are the most frequently used bike type among both customer groups. Annual members recorded 1,274,437 Classic Bike rides and 1,076,999 Electric Bike rides. Casual riders recorded 667,942 Classic Bike rides and 642,174 Electric Bike rides.

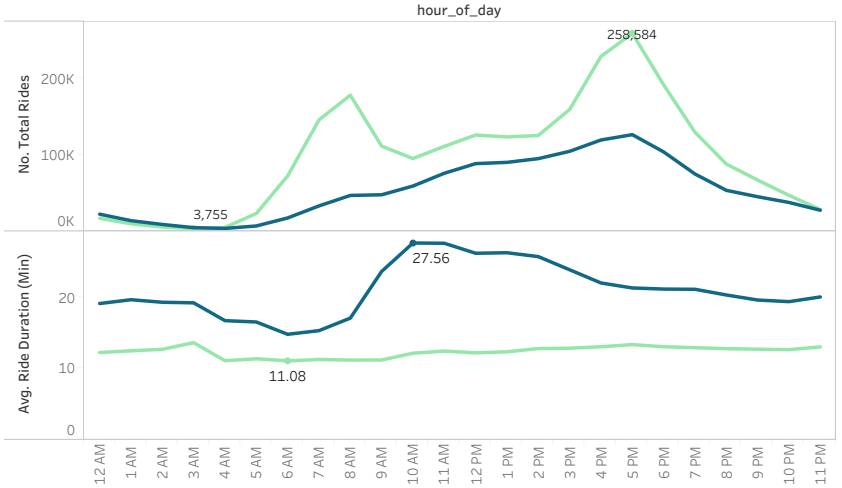
**Recomendation:**
1. Launch a weekend membership campaign, target casual riders before and during weekends, when their ride volume is highest. Highlight the convenience and potential value of annual membership for frequent users.

2. Use location-based marketing, identify stations with both high casual ride volumes and a high proportion of casual riders. Use these locations to test targeted membership promotions and evaluate the results.

## Ride Trend by Day of The Week

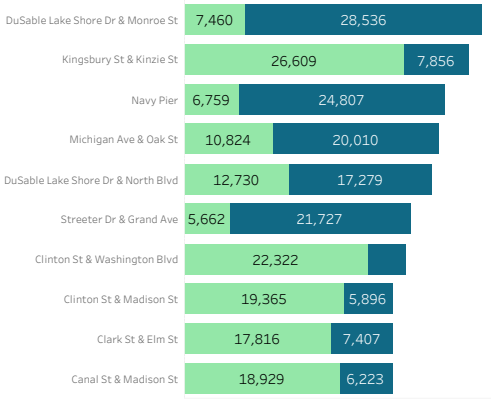


**Insight:**
Annual members maintain relatively consistent ride activity throughout the workweek, with usage peaking on Tuesday. Casual riders, on the other hand, become more active toward the weekend, reaching their highest ride volume on Saturday.

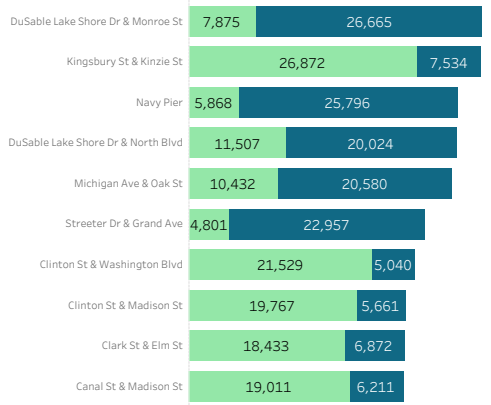


**Insight:**
Annual members show increased activity during the morning and afternoon, with their highest ride volume occurring around 5 PM. Casual riders also become more active in the afternoon, with a noticeable peak around 5 PM that appears to exceed member usage.

## TOP 10 Start Station



## Top 10 End Stations



**Insight:**
DuSable Lake Shore Dr & Monroe St and Navy Pier appear to attract a high number of casual riders. In contrast, Kingsbury St & Kinzie St records substantially more rides from annual members than from casual riders.
